Membuat Efek 3D dengan “Lighting Effect”

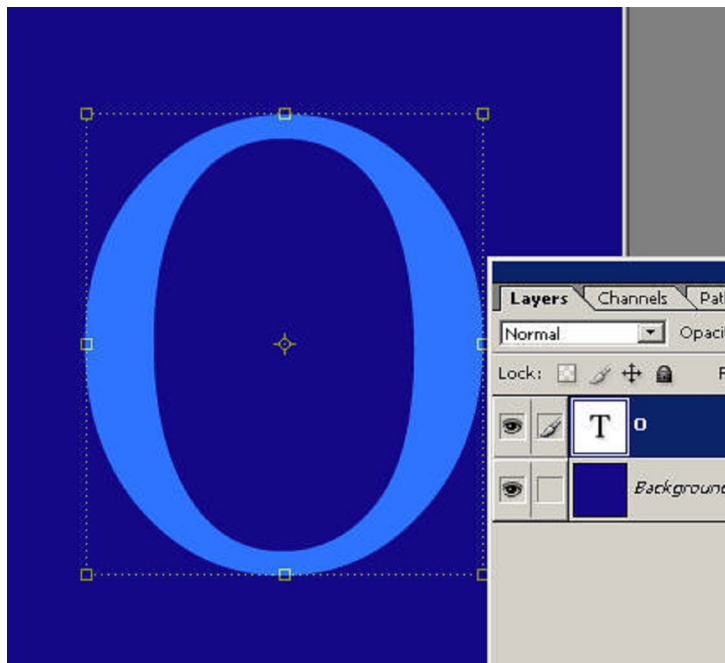

Posted by Sigit eko in [Belajar Photoshop](#), [Photoshop Menengah](#) on 06 25th, 2008 | [9 responses](#)

Dengan Adobe photoshop, Efek 3D bisa dibuat dengan bermacam cara. Salah satunya pake lighting effects. Coba deh... keren banget pokokna mah...

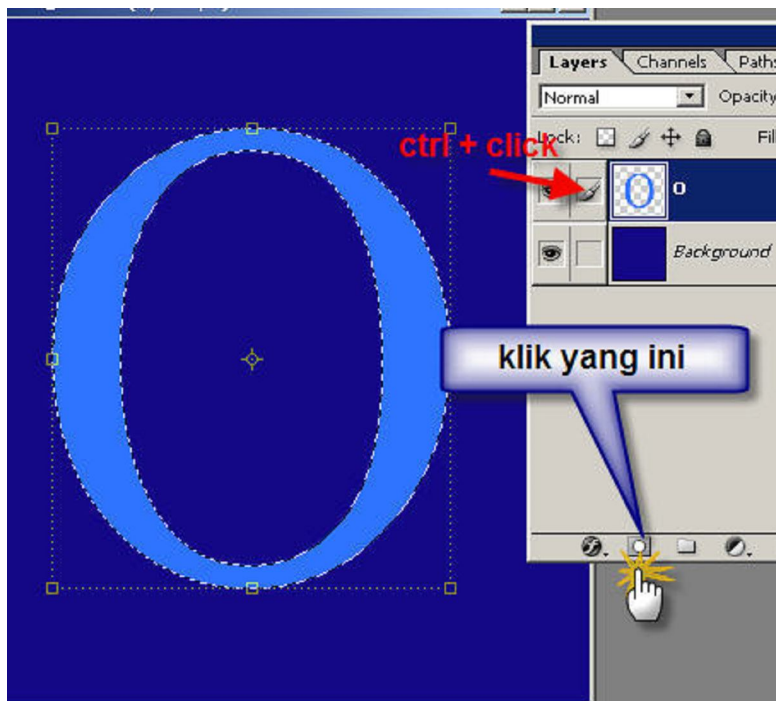

pertamax, buat dokumen baru ukuran seperi ini :

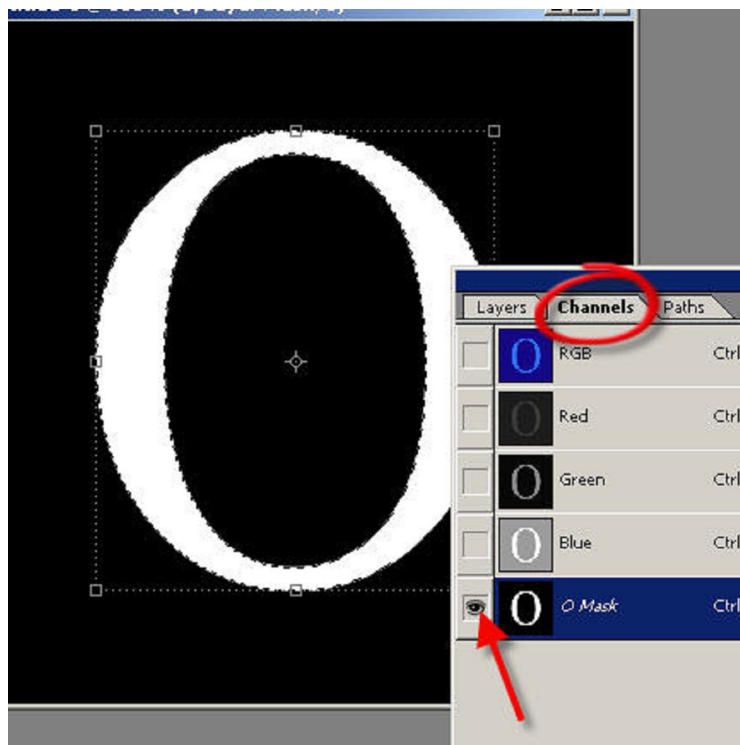

Background pake warna biru tua, terus bikin huruf O pake font sejuta umat “times new roman” warna biru muda.

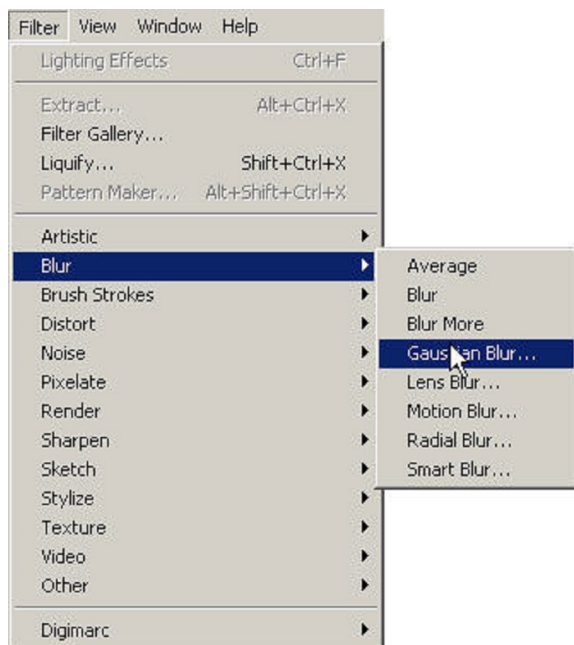

langsung klik kanan layer huruf O tadi klik rasterize layer. Lalu CTRL+click maka huruf O tadi akan terseleksi. Klik layer mask seperti gambar dibawah.

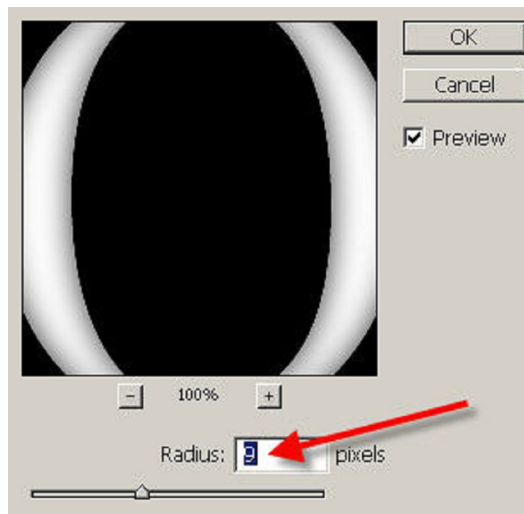

klik channel palette, yang letaknya sebelah layer palette. conteng RGB, red, green, blue di hilangin, nya Tekan CTRL+clik di O - mask, bukan omas.. hehehe..

nah setelah O nya terseleksi, klik filter -> blur > gaussian blur.

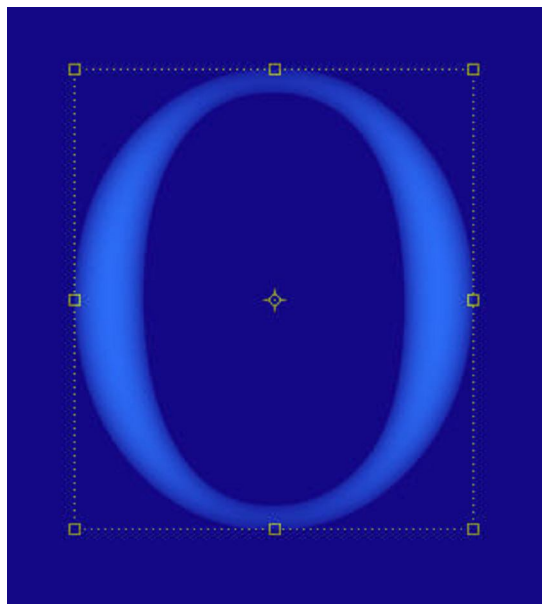

radius nya kasih angka 9 yaa..

Ulangi langkah pem-blur-an ini dengan radius 6 terus 3 terus 1.

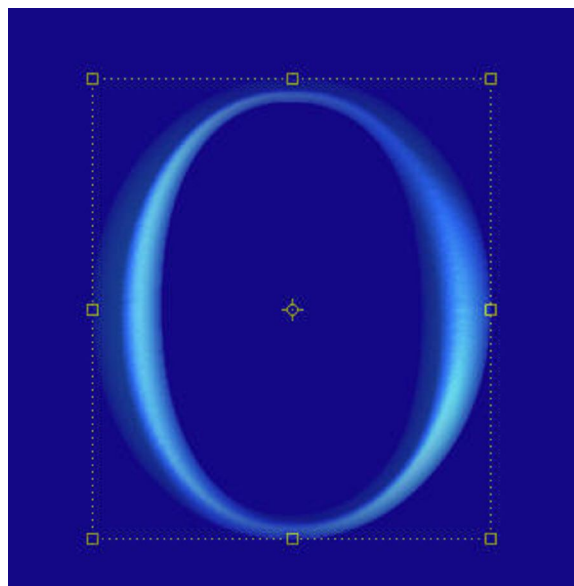

setelah selesai.. kembali ke layer palette. tekan layer O nya. supaya berubah kembali warna nya menjadi biru. tekan CTRL+D untuk menghilangkan seleksi.

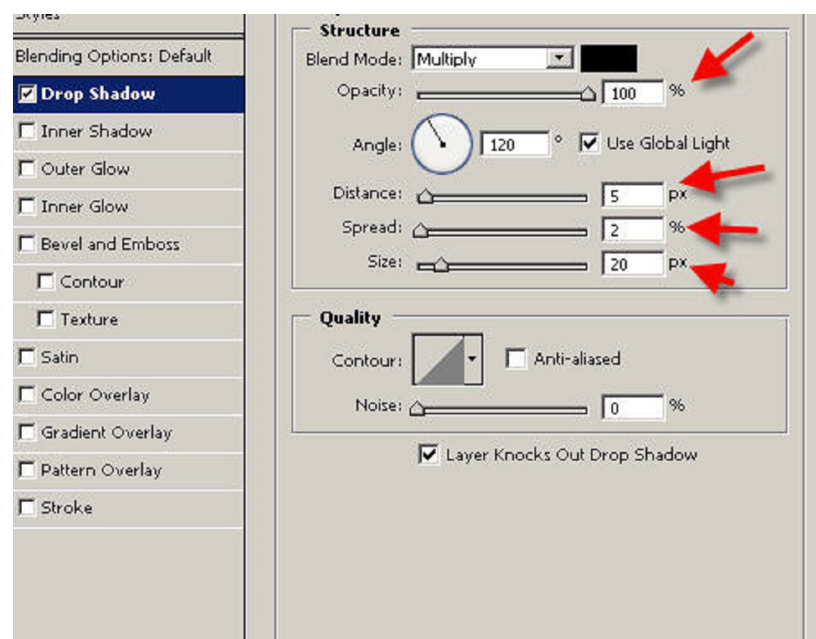

Klik filter > render > lighting effects. setting seperti gambar dibawah :

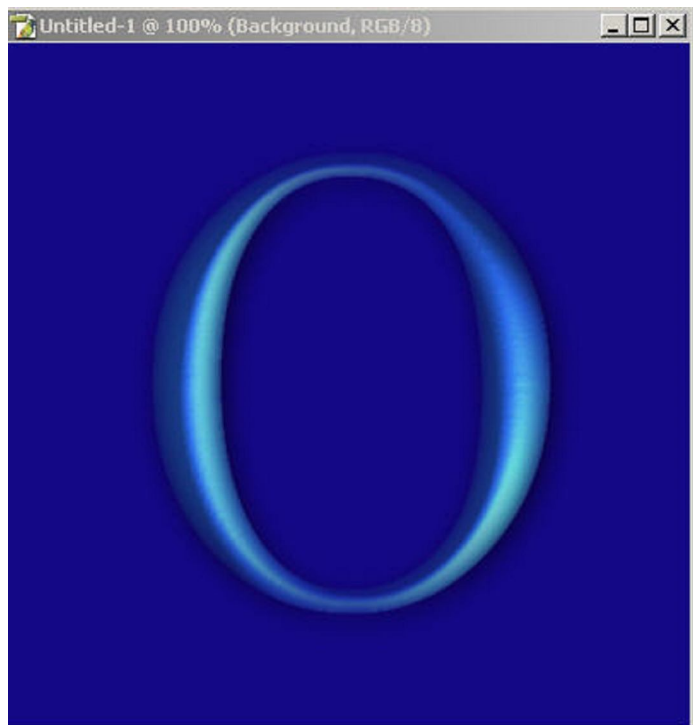

hasilnya begini :

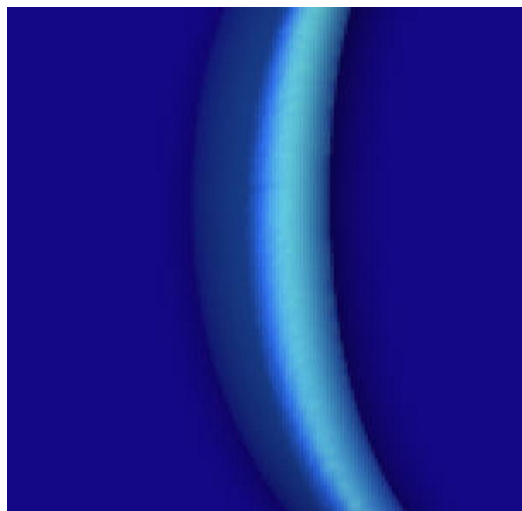

Untuk mempertegas 3D nya pake drop shadow. Klik kanan layer O trus klik blending option, klik drop shadow. setting seperti gambar dibawah :

hasilnya :

keren kan?? coba di Zoom deh , keliatan contour nya, itu dari efek lightning.

Coba yaa..
